COMPANY OVERVIEW

• Urban fire is the most numerous cause to loss of life and property. According to the point, with 22 years' background in electrical equipment production, the founders of "ASHKARSAZAN Iranian Co." have made a decision on design and produce fire alarm systems under "TESLA" trade name in 2011.

In 2012, "TESLA" developed the first specialized laboratory based on ISIRI (Iranian national Standards and Industrial Researchers Institute) and EN54 Instructions and Guidelines of Iran and now we have 17025 license for our laboratory.

The Laboratory has been assigned as one of major assistants and colleagues to ISIRI since then.

NEW STRUCTURE

COMPANY OVERVIEW

NEW STRUCTURE

Alphamatin Iranian is one the biggest Companies in free alarm systems field in Iran. The company has active agents in all cities of country with experienced Salesmanagers. Beside that, the company gets approval from Iranian national standard organization.

WAREHOUSE

PRODUCTION LINE

ASHKARSAN IRANIAN PRODUCTION LINE IS ONE OF THE WELL-EQUIPPED AND AUTOMATED LINES IN IRAN. WE FOCUSED ON MINIMIZING ASSEMBLY AND PRODUCTION FAILURE AND INCREASE THE QUALITY. WE ARE DOING OUR BEST TO REACH INTERNATIONAL STANDARDS AND PRODUCE HIGH QUALITY PRODUCTS IN FIRE ALARM SYSTEMS FIELD.

ASSEMBLY LINE

All products Assemble in factory.

There are four pick & place machines for SMD components and a reflow oven for finishing the process.

SOUNDER SYNCHRONIZATION SYSTEM

- One of the fully equipped fire alarm systems lab in Iran
- National certificates
- National Standard organization agency
- ISO9001 international certificate

SOUND LEVEL TEST

LABORATORY

STANDARD FIRE ROOM FOR TESTING SMOKE DETECTORS

- Fully automatic
- Exclusive analyzing software
- Capability of a detector test at the same time
- With Accurate obscuration meter

BURNAER FLAME TEST SYSTEM

Wind tunnel

- Test smoke and heat detectors for their correct operation and measure their sensitivity.
- Customized and exclusive software
- Accurate obscuration meter
- Save and document the results
- Advanced Temperature and wind speed system

Corrosion chamber

- Automatic Corrosion chamber for sonder tests
- User friend interface
- 7 inch TFT Touch LCD
- Accurate and Calibrated S-2 measurement system
- Temperature and humidity control system
- Advanced settings for customized tests
